the studio

latent visuals. elevated brands.

latent studio is an ai-native visual studio. we produce campaign-grade brand imagery — the kind that used to require a photographer, a stylist, a location, a retoucher, and six weeks — and we produce it in days.

we are based in amman. we work with brands anywhere.

what we sell. ongoing visual production, on retainer. not one-off files — a permanent creative department that sits outside your payroll.

what we are not. a filter, a prompt service, or a cheap alternative to a photographer. we are not the fastest and we are not the cheapest. we are the studio you hire when the image has to carry the brand.

ai is the tool. taste is the craft.

we say "ai" out loud. we never apologise for it, and we never hide it. a brand that is embarrassed by its tools has a taste problem, not a tooling problem.

02 —

three principles. no exceptions. every asset that leaves this studio is checked against all three, and any asset that fails one does not ship.

the principles

01—

restraint

الاختزال

we remove until only the essential remains.

one subject per frame. one idea per post. one accent colour per campaign. the final pass on every asset is a deletion pass, never an addition pass.

02—

story before product

القصة قبل المنتج

every frame earns attention before it asks for it.

the product may not be the first thing the eye lands on. establish tension, atmosphere, or a human beat first — then reveal.

03—

craft in every frame

الحرفة بكل لقطة

ai is the tool. taste is the craft.

generation is the first ten percent. direction, selection, colour, grain, crop, and the ruthless discard of the ninety percent that is merely good — that is the work.

01—

restraint

منشيل كل شي زايد، ويبضل الجوهر.

if an element can be removed without breaking the image, it must be removed. we ship the one frame, not the forty.

02 —

story before product

a leopard's paw resting on a branch, and *then* the emerald. never the emerald alone.

03 —

the mark

THE SYMBOL

the schwa. in phonetics it is the most common vowel sound in human speech, and the one nobody notices. present everywhere, seen nowhere. latent.

it is our symbol, our avatar, our signature, and our sign-off. it closes every caption.

latent

THE WORDMARK

set in lowercase. the schwa replaces the "e". the wordmark is never set in title case, never in all caps, never with a tagline locked to it.

CONSTRUCTION

display grotesk, extra-bold, tracked to -4.5% . the schwa is cut from the same optical size as the letters — it is a letter, not an icon dropped in.

CLEAR SPACE

the counter is the unit.

minimum clear space on all sides equals the height of the schwa's counter — the enclosed space inside the ə. nothing enters that zone. not a tagline, not a second logo, not a photograph's edge.

MINIMUM SIZE

the symbol never appears below **24 px** on screen or **8 mm** in print. below that, the counter closes and it reads as a blob.

x = height of the schwa counter

set in marrow on a page is the entire campaign.

THE MARROW RULE

marrow is not a brand colour to be used freely. it is a punctuation mark. one element per layout — a single letter, a rule, a number, one block.

WORKING RATIO · 90 / 9 / 1

ninety percent ink or ivory. nine percent the other. one percent marrow. the moment marrow appears twice with equal weight in the same frame, it stops being an accent and becomes decoration.

HIERARCHY

**there are
two levels.
there is
no third.**

headlines are set tight — negative tracking, tight leading, weight doing the work. body copy is set small, generous in leading, and never competes with the headline.

in any layout: the thing you read first, and the thing you read second.

THE NUMBERING SIGNATURE

01— 02— 03—

numbers are set with an em dash and a space. this is a signature. keep it.

ARABIC · LOCKED

ibm plex sans arabic

latent ships bilingually. the arabic post is not a lesser copy of the english one — it gets its own hook, its own rhythm, and its own type. one arabic face, locked, open licence, immediately usable. never another.

the image system

THE INK WORLD

near-black studio void. product or subject lit from a single soft source. deep, quiet, expensive.

two worlds. they do not mix inside a single frame.

THE IVORY WORLD

cream paper grain, visible texture, physical. this is where the brand speaks about itself — identity work, principles, type.

COMPOSITION

**wide negative
space. subject
held small — or
cropped intimately
close. never the
middle distance.**

GRAIN · SKIN · IMPERFECTION

perfect is the tell.

every asset carries grain. grain is what separates a render from a photograph, and a photograph from a product shot. it is the studio's fingerprint.

pores. flyaway hairs. the indentation a chain leaves on a collarbone. visual noise is what real cameras capture every day. no clean, plastic, un-grained surface leaves here.

THE IMAGE SYSTEM

never.

- **stock-photo lighting**
- **symmetrical product-on-white**
- **lens flare**
- **bokeh circles as decoration**
- **text over a subject's face**

- **emojis in the artwork**
- **whip cuts, zooms, trend transitions**

the grid is one image.

the profile is a portfolio, not a feed. it is read as one image before any single post is read.

- alternate the worlds. ink post, ivory post. never three of one in a row.
- each row of three holds at least one dark frame and one light frame.
- never two similar crops adjacent.
- pin three: the offer, the principles, the best piece of work.
